

AWESOME®

DISTRIBUTION BROCHURE

DRIVEN BY PERFORMANCE

www.awesomegti.com

AWESOME

WELCOME

Awesome Ltd was established back in 1989 as a result of a hobby that ran away with itself. The word 'Awesome' was aptly chosen when the American cartoon series The Simpsons reached our shores at the same time.

Customers over the years have discovered that Awesome is always striving to be the very best performance parts, tuning and servicing specialist around – constantly exceeding expectations of anyone who deals with us in person, digitally or over the phone.

Awesome is a leader in the supply of performance parts from several manufacturers, many of them exclusively, not only in the UK but globally. Although we are a specialist in VAG-Group vehicles, many of the brands we offer cater for all marques. The full catalogue for any brand we offer is available to you upon request. As our business continues to grow, we will continue to invest in the areas that support our customers most effectively.

With an experienced and dedicated team centred around the supply, distribution and support of performance car parts, Awesome is a strong, reliable partner to help support you and your business.

DRIVEN BY PERFORMANCE

AWESOME®

OUR FACILITIES

In June 2023, Awesome officially opened its doors to its all-new, cutting-edge headquarters, located next door to its previous site in Northbank Industrial Estate, Irlam (which the company has retained to become the official base for sister brands Vagbremtech and Performance M).

This mammoth 30,000sq ft complex undoubtedly pushes car workshop/dyno cell/parts distribution facilities to a whole new level in the UK and far beyond.

RECEPTION AREA

A gleaming reception area with a unique high-polish resin floor houses customer seating and workstation areas, as well as a fully-fledged coffee bar (complete with Awesome-branded coffee) for staff and customers to catch up in a comfortable environment. Bi-fold doors also mean that various development and race cars are regularly shown off within the reception area itself.

WORKSHOP

A glass wall allows customers in reception a detailed insight into the core of the new premises: the vast workshop space, which plays host to six 3.5-tonne two-post ramps, a 5.5-tonne commercial lift and a scissor lift within the four-wheel alignment area. It's no surprise that the workshop is also a spotless space, with touches such as integrated toolboxes flanking the outer walls continuing that streamlined, minimal Awesome branding.

SCAN HERE
TO FLY AROUND OUR HQ!

AWESOME®

// Not only did I want our new headquarters to be the best it possibly could for both staff and customers, but I also wanted to make sure I put my own stamp on the company. With this new setup, I want to inspire others in our amazing industry. //

Mark Ash,
Managing Director

DYNO CELL

The dyno cell is arguably the main highlight of the workshop area – a fully-bespoke room that features a Dynojet 4WD link dynamometer, custom LED lighting as well as no less than six fans that are presented as an art piece in themselves.

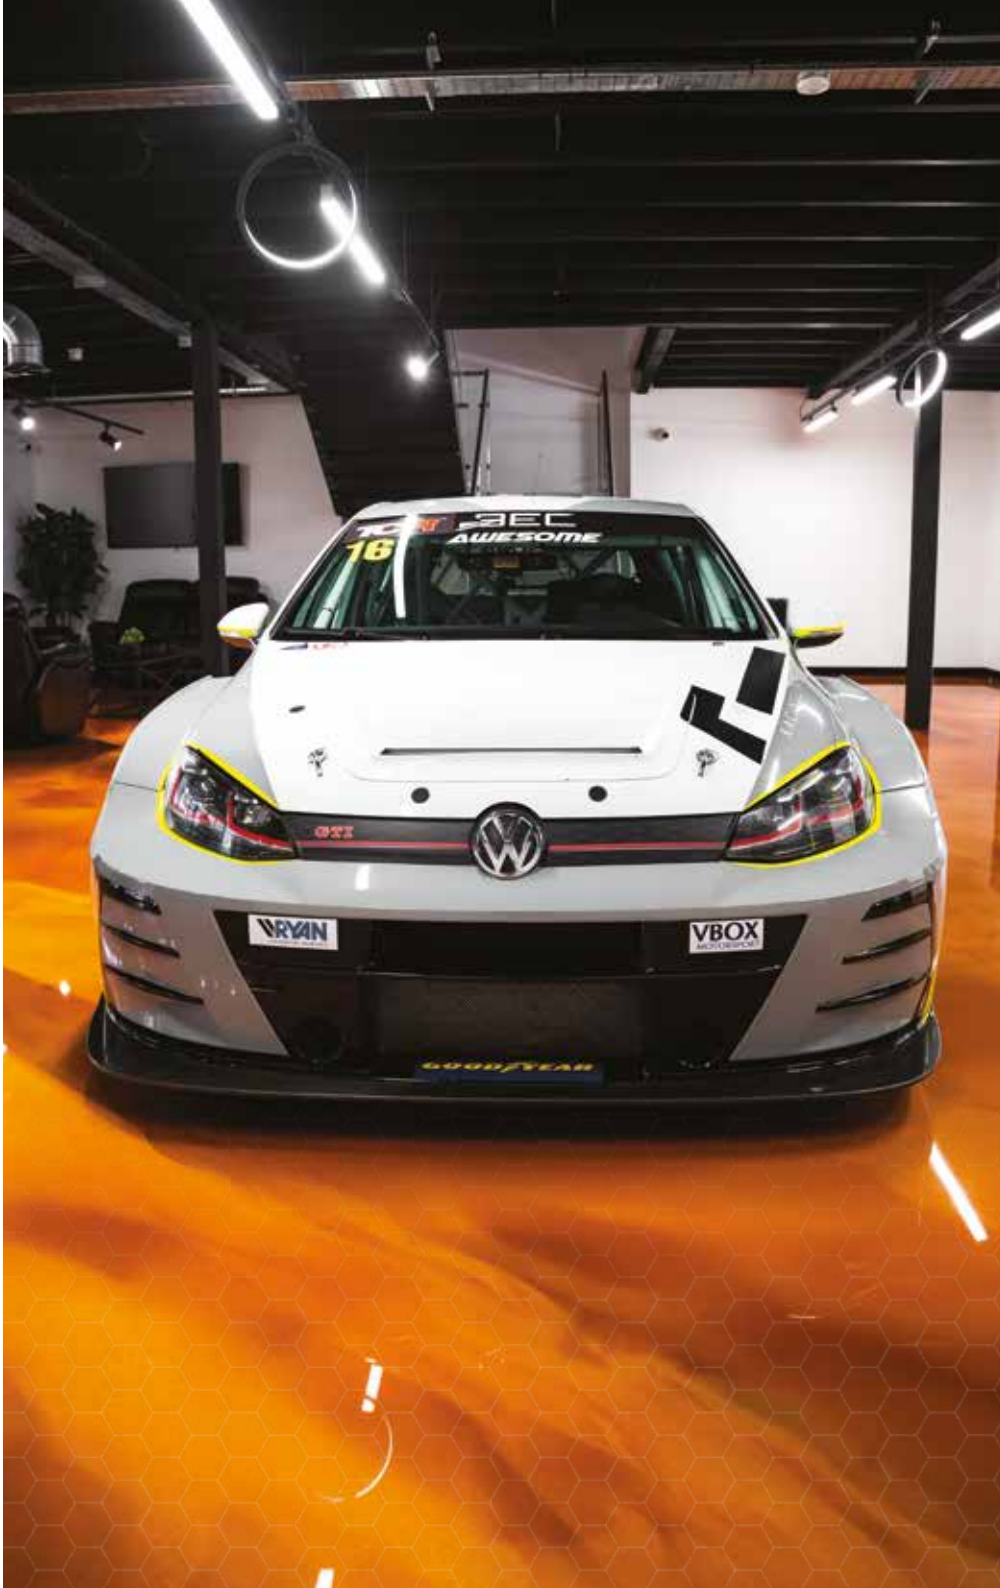

Adjacent to the dyno cell is the dyno lounge – undoubtedly the most prestigious place to watch your car on a rolling road for hundreds of miles around. Not only are customers supplied with headsets to talk to their personal technician from this plush, comfortable setting, but the switchable frosted glass acts as the cherry on the top of this unforgettable experience.

STAFF AREAS & OFFICES

It goes without saying that Awesome staff are treated just as well as customers in their new working home, with spacious offices (all with a nice vantage point of the workshop, of course) and even a fully kitted-out gym making it the best working environment possible.

Within the staff areas, there's also numerous meeting and training rooms for the likes of development days with Awesome's vast network of dealers and resellers.

WHITELINE

THE GO-TO DISTRIBUTOR

Did you know Awesome has a large portfolio of exclusive aftermarket brands we are able to offer to trade?

Over many years, Awesome has built relationships becoming exclusive distributors for many brands as well as gaining distributor status for many others. This brochure is to highlight exactly what brands we have to offer business-to-business.

UNRIVALLED STOCK LEVELS

In recent years Awesome has invested in excess of £600,000 stocking popular fast moving items. This is to ensure we support our network of dealers to the best of our ability. We will continue to invest in our stock as our business continues to grow.

TRADE ENQUIRIES

Awesome has a well-established, knowledgeable sales team to support you as well as having an experienced workshop we can utilise should you need any technical assistance.

For all trade enquiries:

Why **VBT**? First and foremost: pure and undiluted performance; if it doesn't work, it doesn't get supplied, however pretty it might look. The fact that VBT doesn't do anything except performance brake kits means that there are no other distractions, and that it is perfectly placed to devise uncompromising kits that fit perfectly and perform in an exemplary manner. VBT builds brakes for performance applications, specifically for those that intend to drive their cars in the manner in which they were intended, hence why its kits are constructed from some of the most advanced materials around and have garnered praise from professional drivers both in cup cars and endurance racers alike.

The **Fire Safety Stick** is a new, innovative fire extinguisher which takes the guesswork out of using a fire extinguisher. It requires less knowledge or training for the everyday person. An extinguisher which works on five classes of fire, meaning less margin for error if accidentally choosing the incorrect traditional extinguisher, and making the fire worse in a high-stress situation. Ideal for storing in your car in case the worst happens. Best of all: it leaves no mess and no residue behind!

For over 40 years, **Pipercross** has endeavoured to develop the best air filters on the market, in both performance and filtration. Opting to use foam for its greater dirt retention capability while not restricting flow, which has allowed it to keep vehicles of all types performing their best throughout ownership. Manufacturing in the UK using high-quality parts, many of which are locally sourced, each filter is created by hand in a step-by-step process, ensuring the highest level of quality control at every stage of this process.
